01 Your Score

AI VISIBILITY SCORE

LIMITED VISIBILITY

Your AI Visibility Score is **34**/100 — Limited Visibility.

AI systems lack sufficient verified signal to recommend your business.

Your website is strong on Technical Access and AI Readability, so AI systems can read and interpret it cleanly. The overall lands at 34 because Trust Signals and Content Depth are incomplete — those are the signals AI systems use to verify who you are and whether to recommend you. Strong readability without strong identity signals reads as ambiguous to recommendation engines.

Below cohort average among roofing audits (trails 59% of peers, n=33).

Audit completeness: Moderate Business identity weakly confirmed across surfaces.

Watch: Recommendation Readiness trails 98% of roofing peers (n=33).

WHY YOU RECEIVED THIS SCORE

What pulled the score up — and what held it back.

These are the strongest signals AI systems could use, and the ones they couldn't. This is descriptive — it explains the score; it isn't a separate calculation.

TOP POSITIVE CONTRIBUTORS

- ✓ AI systems can reach your site
- ✓ Site structure is AI-readable

TOP NEGATIVE CONTRIBUTORS

- ✗ Reviews and trust signals are limited
- ✗ AI cannot easily verify your business identity
- ✗ Content depth is not sufficient for AI to quote

SECTION 02 · CATEGORY BREAKDOWN

6 DIMENSIONS SCORED

Where the score comes from.

Recommendation Ready 20 / 100

25%

How clearly AI systems can identify who you are and what you do.

Technical Access 100 / 100

20%

Whether AI systems can access and understand your website content.

Trust Signals 10 / 100

20%

Whether reviews, citations, and consistent business info make AI confident enough to recommend you.

Content Depth 20 / 100

15%

Whether your site has the depth of service and FAQ content AI can quote when answering customers.

Brand Presence 40 / 100

10%

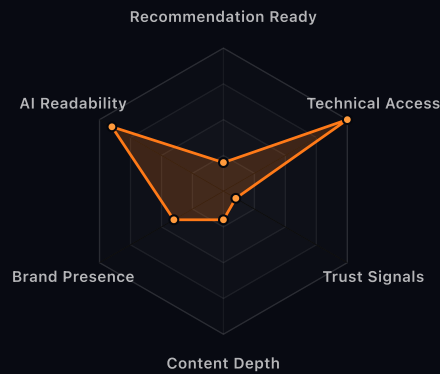

Whether AI can confidently identify your business as one consistent entity across the web.

AI Readability 90 / 100

10%

How easily AI systems can retrieve and interpret your site structure and content.

SCORE DISTRIBUTION AT A GLANCE

The GeoViz score reflects how confidently modern AI systems can identify, interpret, and reference your business using publicly accessible website and trust signals. Directional — not a ranking guarantee.

WHERE AI SYSTEMS MOSTLY AGREED

4 AI SYSTEMS

AI consensus summary.

BUSINESS TYPE IDENTIFIED

- All 4 AI systems identified Moore Roofing as a commercial roofing contractor.

SERVICE CATEGORY IDENTIFIED

- Shared service understanding: Flat roofing, Low-slope roofing, Roof repair.

LOCATION UNDERSTANDING

- All 4 AI systems identified Moore Roofing's service area as Ohio, Michigan, and Indiana.

MISSING TRUST SIGNALS

- Moore Roofing lacks consistent trust signals (reviews, credentials, third-party verification) that AI systems weigh heavily.

MISSING RECOMMENDATION SIGNALS

- No verifiable reviews
- Inconsistent business name
- No street address

CROSS-MODEL AGREEMENT **LOW**

Cross-model agreement measures how strongly the four AI systems converged on this audit's findings. It is a separate read from the audit-completeness label on the score card, and is never used as a score in itself.

NEXT STEP

Need help fixing these issues?

AI systems lack confidence in recommending Moore Roofing today. Our Foundation Fix service implements the improvements identified in this audit — business details AI tools can verify, trust signals, and clear service descriptions — so AI systems can confidently recommend Moore Roofing.

SECTION 04 · DIAGNOSIS

TOP 3 ISSUES

Top 3 Issues

#1 AI Has No Way to Verify Your Business Identity

TRUST SIGNAL

WHAT WE FOUND

The homepage source contains no machine-readable block that tells AI tools your business name, address, phone number, or service area.

WHY IT MATTERS

Without a confirmed business identity in the page source, AI tools are likely to skip this business and cite a competitor they can verify faster.

BUSINESS IMPACT

You forfeit the recommendation slot to competitors AI systems can confirm.

RECOMMENDED FIX

Add a LocalBusiness identity block with name, address, phone, and service area.

#2 The Homepage Has Almost Nothing for AI to Read

HIGH IMPACT

WHAT WE FOUND

Only 77 words of readable content exist on the homepage — no description of what you do, who you do it for, or where you work.

WHY IT MATTERS

When a customer asks "who should I hire for commercial roofing in Ohio?", AI tools pull answers from sites with real content; a 77-word page offers nothing to quote.

BUSINESS IMPACT

A content-rich competitor gets quoted instead.

RECOMMENDED FIX

Expand each service page and add a short FAQ in plain customer language.

#3 Your Business Name and Contact Info Don't Match Across the Web

TRUST SIGNAL

WHAT WE FOUND

The business name and contact details differ across the homepage, footer, and schema.

WHY IT MATTERS

AI systems cross-check details to build trust; conflicting signals reduce confidence.

BUSINESS IMPACT

Lower recommendation confidence and a risk of being confused with another company.

RECOMMENDED FIX

Standardize the name, phone, and address on every surface, then mirror them in schema.

These fixes directly map to the issues above, but this section focuses only on action.

SECTION 05 · ACTION PLAN

TOP 3 FIXES

What to Fix First

#1 Add a Machine-Readable Business Identity to Your Site

HIGH IMPACT

ESTIMATED IMPACT: STRONG GAIN

WHAT WE FOUND

Recommended Fix — Install a LocalBusiness identity block in your page source with your exact name, address, phone, website, and coordinates. **Business Impact** — AI tools can verify and confirm your details, making them far more likely to include you when recommending local roofers.

BUSINESS IMPACT

AI tools can verify and confirm your details, making them far more likely to include you when recommending local roofers.

RECOMMENDED FIX

Install a LocalBusiness identity block in your page source with your exact name, address, phone, website, and coordinates.

#2 Expand Your Homepage and Service Pages With Real Content

HIGH IMPACT

ESTIMATED IMPACT: STRONG GAIN

WHAT WE FOUND

Recommended Fix — Write at least 300 words per primary service page covering what the service is, where you do it, what the customer gets, and how to reach you. Add a short FAQ. **Business Impact** — AI tools gain enough content to quote you in a real answer instead of a competitor.

BUSINESS IMPACT

AI tools gain enough content to quote you in a real answer instead of a competitor.

RECOMMENDED FIX

Write at least 300 words per primary service page covering what the service is, where you do it, what the customer gets, and how to reach you. Add a short FAQ.

#3

Make Your Business Name, Phone, and Address Match Everywhere

HIGH IMPACT

ESTIMATED IMPACT: STRONG GAIN

WHAT WE FOUND

Recommended Fix — Audit your homepage, footer, and third-party listings and make the name, phone, and address identical on every surface. **Business Impact** — AI systems can match your business across sources, building recommendation confidence.

BUSINESS IMPACT

AI systems can match your business across sources, building recommendation confidence.

RECOMMENDED FIX

Audit your homepage, footer, and third-party listings and make the name, phone, and address identical on every surface.

SECTION 06 · BUSINESS IMPACT

BUSINESS OUTCOME

Business Impact

Moore Roofing has operated since 1988 — decades of real-world reputation not reflected in the signals your website sends to AI tools. Closing the identity, trust, and content gaps moves you from "readable" to "recommendable."

AI VISIBILITY FOUNDATION FIX

Fix the foundation AI systems use to recommend you

A scoped infrastructure engagement that addresses the underlying technical, trust, and discoverability gaps surfaced in your audit — so AI systems can identify, verify, and reference your business more confidently.
