01 Your Score

AI VISIBILITY SCORE

LIMITED VISIBILITY

Your AI Visibility Score is **43**/100 — Limited Visibility.

AI systems lack sufficient verified signal to recommend your business.

Your website is strong on Technical Access and AI Readability, so AI systems can read and interpret it cleanly. The overall lands at 43 because Trust Signals and Recommendation Ready are incomplete — those are the signals AI systems use to verify who you are and whether to recommend you. Strong readability without strong identity signals reads as ambiguous to recommendation engines.

Bottom 40% among roofing audits (n=37).

Audit completeness: Moderate Schema certainty is the weakest input — limited structured data reduces how confidently we can verify identity.

Watch: Trust Signals are the widest gap holding the score down.

AUDIT DATE

Jun 1, 2026

GEO-URE-0001

WHY YOU RECEIVED THIS SCORE

What pulled the score up — and what held it back.

These are the strongest signals AI systems could use, and the ones they couldn't. This is descriptive — it explains the score; it isn't a separate calculation.

TOP POSITIVE CONTRIBUTORS

- ✓ AI systems can reach your site
- ✓ Site structure is AI-readable

TOP NEGATIVE CONTRIBUTORS

- ✗ Reviews and trust signals are limited
- ✗ AI cannot easily verify your business identity
- ✗ Brand identity is not consistent across the web

SECTION 02 · CATEGORY BREAKDOWN

6 DIMENSIONS SCORED

Where the score comes from.

Recommendation Ready 16 / 100

25%

How clearly AI systems can identify who you are and what you do.

Technical Access 100 / 100

20%

Whether AI systems can access and understand your website content.

Trust Signals 10 / 100

20%

Whether reviews, citations, and consistent business info make AI confident enough to recommend you.

Content Depth 53 / 100

15%

Whether your site has the depth of service and FAQ content AI can quote when answering customers.

Brand Presence 20 / 100

10%

Whether AI can confidently identify your business as one consistent entity across the web.

AI Readability 90 / 100

10%

How easily AI systems can retrieve and interpret your site structure and content.

SCORE DISTRIBUTION AT A GLANCE

The GeoViz score reflects how confidently modern AI systems can identify, interpret, and reference your business using publicly accessible website and trust signals. Directional — not a ranking guarantee.

HOW AI SYSTEMS CURRENTLY UNDERSTAND YOUR BUSINESS

4 AI SYSTEMS REVIEWED

What each AI system can — and can't — tell about you.

Each card summarizes how clearly four major AI systems can identify your business, services, location, and trustworthiness from publicly accessible signals.

ChatGPT

REVIEWED

ChatGPT had the clearest read of Summit Ridge Roofing's business identity (52/100).

HOW CHATGPT SEES SUMMIT RIDGE ROOFING

Roofing contractor

INDUSTRY UNDERSTOOD

Roofing contractor

LOCATION UNDERSTOOD

your service area

SERVICES UNDERSTOOD

- Roof replacement
- Storm damage repair
- Inspections

WHAT CHATGPT IS MISSING ABOUT SUMMIT RIDGE ROOFING

- No verifiable reviews
- No license number
- Inconsistent phone numbers

CONFIDENCE

industry **Medium** · service area **Low** · recommendation **Low**

SOURCES USED

No strong third-party business sources found. (2 generic web references reviewed)

WOULD CHATGPT COMFORTABLY RECOMMEND SUMMIT RIDGE ROOFING?

PARTIAL

REASON: Clear roofing identity, but no trust signals to justify naming this business over competitors.

Claude

REVIEWED

Claude understood Summit Ridge Roofing as a residential roofing.

HOW CLAUDE SEES SUMMIT RIDGE ROOFING

Residential roofing

INDUSTRY UNDERSTOOD

Residential roofing

LOCATION UNDERSTOOD

your service area

SERVICES UNDERSTOOD

- Roof replacement
- Repairs

WHAT CLAUDE IS MISSING ABOUT SUMMIT RIDGE ROOFING

- No machine-readable business info
- No aggregate rating

CONFIDENCE

industry **Medium** · service area **Low** · recommendation **Low**

SOURCES USED

No strong third-party business sources found. (1 generic web reference reviewed)

WOULD CLAUDE COMFORTABLY RECOMMEND SUMMIT RIDGE ROOFING?

PARTIAL

REASON: Understands the service offering; cannot verify trust or location confidently.

Gemini

REVIEWED

Gemini was the most cautious — would not actively recommend Summit Ridge Roofing today.

WOULD GEMINI COMFORTABLY RECOMMEND SUMMIT RIDGE ROOFING?

NO

REASON: Insufficient structured signal to recommend with confidence.

Perplexity

REVIEWED

Perplexity understood Summit Ridge Roofing as a roofing contractor.

HOW PERPLEXITY SEES SUMMIT RIDGE ROOFING

Roofing contractor

INDUSTRY UNDERSTOOD

Roofing contractor

LOCATION UNDERSTOOD

your service area

SERVICES UNDERSTOOD

- Roof replacement
- Storm repair

WHAT PERPLEXITY IS MISSING ABOUT SUMMIT RIDGE ROOFING

- No reviews indexed
- No license

CONFIDENCE

industry **Medium** · service area **Low** · recommendation **Low**

SOURCES USED

No strong third-party business sources found. (1 generic web reference reviewed)

WOULD PERPLEXITY COMFORTABLY RECOMMEND SUMMIT RIDGE ROOFING?

PARTIAL

REASON: Recognizes the business type but finds no third-party trust to cite.

WHERE AI SYSTEMS MOSTLY AGREED

4 AI SYSTEMS

AI consensus summary.

BUSINESS TYPE IDENTIFIED

- 2 of 4 AI systems identified Summit Ridge Roofing as a roofing contractor.

SERVICE CATEGORY IDENTIFIED

- Shared service understanding: Roof replacement.

LOCATION UNDERSTANDING

- All 4 AI systems identified Summit Ridge Roofing's service area as your service area.

MISSING TRUST SIGNALS

- Summit Ridge Roofing lacks consistent trust signals (reviews, credentials, third-party verification) that AI systems weigh heavily.

MISSING RECOMMENDATION SIGNALS

- AI systems lack the surrounding context (clear service area, pricing direction, hours) to confidently recommend Summit Ridge Roofing.

CROSS-MODEL AGREEMENT **LOW**

Cross-model agreement measures how strongly the four AI systems converged on this audit's findings. It is a separate read from the audit-completeness label on the score card, and is never used as a score in itself.

NEXT STEP

Need help fixing these issues?

AI systems lack confidence in recommending Summit Ridge Roofing today. Our Foundation Fix service implements the improvements identified in this audit — business details AI tools can verify, trust signals, and clear service descriptions — so AI systems can confidently recommend Summit Ridge Roofing.

[See the Foundation Fix plan below in Section 05 →](#)

SECTION 04 · DIAGNOSIS

TOP 3 ISSUES

Top 3 Issues

#1

No machine-readable business info identifies your business to AI systems

TRUST SIGNAL

WHAT WE FOUND

Your homepage ships no LocalBusiness AI-readable business data. AI systems have no machine-readable record of your name, address, phone, hours, or service area.

WHY IT MATTERS

When a customer asks an AI assistant "who's a good roofer near me," the model needs a clear, structured entity to name. Without it, you are invisible at the exact moment of intent.

BUSINESS IMPACT

Competitors with complete schema get surfaced and named; you do not, even when your service quality is higher.

RECOMMENDED FIX

Add a LocalBusiness AI-readable business data block with name, address, telephone, geo, and openingHours.

#2 Trust signals are missing or unverifiable

TRUST SIGNAL

WHAT WE FOUND

No reviews, ratings, licensing, or credential markers are machine-readable on the site. The three phone numbers across header, footer, and contact page do not match.

WHY IT MATTERS

AI systems weight third-party trust and internal consistency heavily before recommending a business. Conflicting contact details read as an unreliable entity.

BUSINESS IMPACT

Even with strong technical access, low trust caps your recommendation readiness — this is the single largest drag on your overall score.

RECOMMENDED FIX

Consolidate to one phone number sitewide and expose review/aggregateRating and license credentials in schema.

#3 Service pages are thin for AI search

HIGH IMPACT

WHAT WE FOUND

Service pages average under 120 words and lack a FAQ block answering the questions customers actually ask.

WHY IT MATTERS

AI systems quote depth. Thin pages give the model nothing to cite when answering a customer question about your services.

BUSINESS IMPACT

You forfeit the "quotable answer" slot to competitors with deeper, FAQ-structured content.

RECOMMENDED FIX

Expand each core service page and add a structured FAQ section per service.

These fixes directly map to the issues above, but this section focuses only on action.

SECTION 05 · ACTION PLAN

TOP 3 FIXES

What to Fix First

#1 Publish LocalBusiness schema

HIGH IMPACT

ESTIMATED IMPACT: STRONG GAIN

WHAT WE FOUND

Zero structured identity today.

BUSINESS IMPACT

Directly lifts Structured Identity and Recommendation Readiness, the two weakest categories.

RECOMMENDED FIX

Deploy a validated LocalBusiness AI-readable business data block to the homepage head.

#2 Unify business identity across the site

HIGH IMPACT

ESTIMATED IMPACT: STRONG GAIN

WHAT WE FOUND

Three different phone numbers; inconsistent business name in footer.

BUSINESS IMPACT

Removes the entity-consistency penalty AI systems apply to conflicting signals.

RECOMMENDED FIX

Standardize name, address, and phone on every surface, then mirror them in schema.

#3 Deepen and FAQ-structure service content

HIGH IMPACT

ESTIMATED IMPACT: STRONG GAIN

WHAT WE FOUND

Thin service pages, no FAQ.

BUSINESS IMPACT

Makes your pages quotable in AI answers.

RECOMMENDED FIX

Add depth + a per-service FAQ block written in plain customer language.

SECTION 06 · BUSINESS IMPACT

BUSINESS OUTCOME

Business Impact

Today, AI systems can read your site but cannot confidently recommend Summit Ridge Roofing — the technical foundation is strong, the trust and identity layer is not. Closing the schema, trust, and content gaps moves you from "readable" to "recommendable," which is the threshold that determines whether your business is named when a customer asks an AI who to hire.

AI VISIBILITY FOUNDATION FIX

Fix the foundation AI systems use to recommend you

A scoped infrastructure engagement that addresses the underlying technical, trust, and discoverability gaps surfaced in your audit — so AI systems can identify, verify, and reference your business more confidently.
