01 Your Score

AI VISIBILITY SCORE

NEEDS WORK

Your AI Visibility Score is 48/100 — Needs Work.

Key visibility signals are missing — competitors with cleaner structure may be cited first.

Your website is strong on AI Readability, so AI systems can read and interpret it cleanly. The overall lands at 48 because Recommendation Ready and Trust Signals are incomplete — those are the signals AI systems use to verify who you are and whether to recommend you. Strong readability without strong identity signals reads as ambiguous to recommendation engines.

Below cohort average among legal audits (trails 52% of peers, n=28).

Audit completeness: Moderate Business identity weakly confirmed across surfaces.

Watch: Trust Signals are the widest gap holding the score down.

AUDIT DATE
Jun 3, 2026

REPORT ID
GEO-BRE-0001

WHY YOU RECEIVED THIS SCORE

What pulled the score up — and what held it back.

These are the strongest signals AI systems could use, and the ones they couldn't. This is descriptive — it explains the score; it isn't a separate calculation.

TOP POSITIVE CONTRIBUTORS

- ✓ Site structure is AI-readable
- ✓ AI systems can reach your site
- ✓ Content depth enough to quote

TOP NEGATIVE CONTRIBUTORS

- ⊗ AI cannot easily verify your business identity
- ⊗ Reviews and trust signals are limited
- ⊗ Brand identity is not consistent across the web

The GeoViz score reflects how confidently modern AI systems can identify, interpret, and reference your business using publicly accessible website and trust signals. Directional — not a ranking guarantee.

WHERE AI SYSTEMS MOSTLY AGREED

4 AI SYSTEMS

AI consensus summary.

BUSINESS TYPE IDENTIFIED

- All 4 AI systems identified LaBre Law as a personal injury law firm.

SERVICE CATEGORY IDENTIFIED

- Shared service understanding: Personal injury, Car accidents, Wrongful death.

LOCATION UNDERSTANDING

- All 4 AI systems identified LaBre Law's service area as Toledo, Ohio.

MISSING TRUST SIGNALS

- LaBre Law lacks consistent trust signals (reviews, credentials, third-party verification) that AI systems weigh heavily.

MISSING RECOMMENDATION SIGNALS

- No AI-readable reviews
- No bar credentials in structured business details
- a setting telling search and AI systems to skip the page on a key page
- Inconsistent phone number

CROSS-MODEL AGREEMENT **LOW**

Cross-model agreement measures how strongly the four AI systems converged on this audit's findings. It is a separate read from the audit-completeness label on the score card, and is never used as a score in itself.

NEXT STEP

Need help fixing these issues?

AI systems lack confidence in recommending LaBre Law today. Our Foundation Fix service implements the improvements identified in this audit — business details AI tools can verify, trust signals, and clear service descriptions — so AI systems can confidently recommend LaBre Law.

Whether AI can confidently identify your business as one consistent entity across the web.

AI Readability **90** / 100

10%

How easily AI systems can retrieve and interpret your site structure and content.

SCORE DISTRIBUTION AT A GLANCE

SECTION 04 · DIAGNOSIS

TOP 3 ISSUES

Top 3 Issues

#1 AI Has No Way to Verify Your Business Identity

HIGH IMPACT

WHAT WE FOUND

The homepage has no business details AI systems can verify describing the firm's name, address, phone, or practice areas.

WHY IT MATTERS

Without business details AI systems can verify in the page source, AI tools skip the firm and cite a competitor they can confirm faster.

BUSINESS IMPACT

You lose the recommendation slot to firms AI systems can verify.

RECOMMENDED FIX

Add a LocalBusiness identity block with name, address, phone, and practice areas.

#2 A Key Page Tells AI Systems to Skip It

CRITICAL

WHAT WE FOUND

a setting telling search and AI systems to skip the page is set on an important page.

WHY IT MATTERS

This setting tells search and AI systems not to read the page, so its content is invisible to them.

BUSINESS IMPACT

Content you paid to create can't be quoted or cited.

RECOMMENDED FIX

Remove the a setting telling search and AI systems to skip the page from pages you want AI systems to read.

#3 Trust Signals Are Thin

TRUST SIGNAL

WHAT WE FOUND

Few AI-readable reviews, credentials, or citations.

WHY IT MATTERS

AI systems weigh third-party trust heavily before recommending a firm.

BUSINESS IMPACT

Lower recommendation confidence than firms with visible reviews.

RECOMMENDED FIX

Expose reviews and credentials in business details AI systems can verify.

These fixes directly map to the issues above, but this section focuses only on action.

SECTION 05 · ACTION PLAN

TOP 3 FIXES

What to Fix First

#1 Add a AI-readable Business Identity

HIGH IMPACT

ESTIMATED IMPACT: STRONG GAIN

WHAT WE FOUND

Recommended Fix — Install a LocalBusiness identity block with your exact name, address, phone, website, and coordinates. **Business Impact** — AI tools can verify and confirm the firm, making it far more likely to be named when recommending local attorneys.

BUSINESS IMPACT

AI tools can verify and confirm the firm, making it far more likely to be named when recommending local attorneys.

RECOMMENDED FIX

Install a LocalBusiness identity block with your exact name, address, phone, website, and coordinates.

#2

Remove the a setting telling search and AI systems to skip the page From Key Pages

CRITICAL

ESTIMATED IMPACT: HIGHEST PRIORITY

WHAT WE FOUND

Recommended Fix — Audit page settings and remove the a setting telling search and AI systems to skip the page from pages you want indexed. **Business Impact** — Important content becomes readable by search and AI systems again.

BUSINESS IMPACT

Important content becomes readable by search and AI systems again.

RECOMMENDED FIX

Audit page settings and remove the a setting telling search and AI systems to skip the page from pages you want indexed.

#3 Expose Reviews and Credentials

TRUST SIGNAL

ESTIMATED IMPACT: TRUST BOOST

WHAT WE FOUND

Recommended Fix — Add structured business details for reviews, bar credentials, and case results. **Business Impact** — Stronger trust signals raise recommendation confidence.

BUSINESS IMPACT

Stronger trust signals raise recommendation confidence.

RECOMMENDED FIX

Add structured business details for reviews, bar credentials, and case results.

SECTION 06 · BUSINESS IMPACT

BUSINESS OUTCOME

Business Impact

LaBre Law has a real reputation that isn't reflected in the signals the website sends to AI tools. Closing the identity, indexing, and trust gaps moves the firm from "readable" to "recommendable" when a client asks an AI who to hire.

AI VISIBILITY FOUNDATION FIX

Fix the foundation AI systems use to recommend you

A scoped infrastructure engagement that addresses the underlying technical, trust, and discoverability gaps surfaced in your audit — so AI systems can identify, verify, and reference your business more confidently.
